Emergencies

If you have an urgent problem, please call our office ***FIRST*** for instructions. Perhaps the problem can be handled without the expense and inconvenience of an emergency room visit, either by phone or in the office. Aside from the office hours listed above, all calls to our office number will be forwarded to us directly, or the answering service will be able to locate a member of our group 24 hours a day.

If your problem cannot be handled over the telephone, we can alert the emergency room personnel, saving time in ordering hospital services. If, *in an emergency*, you are unable to reach us, proceed immediately to the nearest emergency room, where you are entitled to request that one of us be called to provide any needed medical care for if so desired.
